RAJAT LAKHINA

Mobile Development Professional

Pursue opportunities to utilize a wealth of experience in mobile development and solution architecture, aiming to contribute to innovative projects that enhance scalability and security in the IT sector.

PROFILE SUMMARY

- Possess **nearly 10 years of extensive experience in mobile application development and architectural solutions**, focusing on the design and implementation of secure and scalable frameworks in the tech industry.
- **Working as a Senior Consultant at ThoughtWorks**, directing mobile solutions by managing architectural design, implementing.
- **Proven skills to lead end-to-end mobile product lifecycles, from concept to deployment**, across iOS, Android, and cross-platform frameworks.
- **Expertise in architecting scalable, modular, and secure mobile solutions**, enabling teams to deliver high-performance applications with reduced time-to-market.
- Showcased **experience in cross-functional team leadership, mentoring developers, and aligning stakeholders**, ensuring business objectives translate into robust mobile solutions.
- **Skilled at driving mobile technology adoption and innovation**, including modern concurrency models, offline-first architecture, & cloud integration.
- **Track record of optimizing operational efficiency and app performance**, achieving measurable improvements in security, maintainability, and user engagement.
- **Strong decision-making capabilities in high-stakes projects**, balancing technical excellence, project timelines, and resource allocation.
- **Experience in agile transformation and DevOps practices**, promoting continuous delivery, automated testing, and high-quality releases.
- **Skilled in collaborating with enterprise clients and global stakeholders**, aligning mobile solutions with business strategy and product vision.

SKILLS

Mobile Frameworks & SDKs: iOS SDK | Cocoa Touch | Core Animation | Core Data | Core Location | Maps | Google Maps | Push Notification | BLE | Combine | GraphQL | SQLite

Architecture & Design Patterns: Solution Architecture | Modular Architecture | MVVM | VIP | MVC | Clean Architecture | Modular Design | Delegation Design | Dependency Injection | Singleton | SOLID | Offline-First Design

Development Practices & Methodologies: Software Development Life Cycle (SDLC) | Agile | Agile Tools | CI/CD | TDD | Unit Testing | Code Reviews | Feature Flag | AB Testing | Mentorship

Performance, Debugging & Monitoring: Memory Management | Multithreading | Concurrency | App Dynamics | APM | Crashlytics | Xcode Instruments | Performance Profiling

Tools & Build Systems: Xcode | Visual Studio | SPM | CocoaPods | Git | Jenkins | Fastlane | GitHub Actions

CORE COMPETENCIES

- Scalable Mobile Architecture
- Modular & Reusable Design Patterns
- Micro-Frontend
- Cross-Platform Solution Architecture
- App Security & Data Privacy Compliance
- Technical Mentorship & Team Managment
- Cross-Functional Collaboration
- Agile & Scrum Leadership
- Stakeholder Alignment & Reporting
- Code Review & Quality Assurance
- Scalability & Reliability Engineering
- Product Roadmap Contribution

EDUCATION

- **Bachelor of Technology** from N.C. College of Engineering in 2016
- **Diploma in Computer Science & Engineering** from G.B.N. Polytechnic in 2013

WORK EXPERIENCE

Thoughtworks, Gurugram | Since July 2024 | **Senior Consultant (Mobile Applications)**

- Spearheading technical leadership in mobile solution architecture, managing design, development, and end-to-end delivery to ensure robust, scalable, and high-performance applications.
- Collaborating with cross-functional teams and stakeholders to align business objectives with secure, efficient, and innovative mobile solutions, driving operational excellence and user satisfaction.

Project 1:	TeleMessage
Duration:	6 Months
Link:	https://apps.apple.com/us/app/tm-tlgrm/id1630122033

- Spearheaded security automation initiatives, achieving a 15% enhancement in data protection across the TeleMessage platform while reinforcing enterprise-grade privacy and compliance standards.
- Designed and deployed an automated multi-repo code merge system, reducing manual effort, mitigating merge conflicts, and accelerating development lifecycle efficiency.
- Directed end-to-end development and maintenance of the Signal-based enterprise messaging application, ensuring high scalability, robust reliability, and stringent privacy compliance across platforms.

Project 2:	REA - Real Estate App
Duration:	9 Months
Link:	https://apps.apple.com/au/app/realestate-com-au-property/id404667893

- Architected and optimized SwiftUI-based modules for property discovery, listings, and user profiles, delivering intuitive navigation, responsive layouts, and superior user experience.
- Enhanced user engagement by 15% through interactive map views, clustering, and real-time property updates, driving higher platform adoption and retention.

DTC Infotech, Remote | July 2023 to July 2024 | **Senior Software Developer**

- Directed technical development and architectural design for two mobile applications at DTC Infotech, collaborating with multiple leads and stakeholders to ensure scalable, high-quality delivery.
- Delivered innovative mobile solutions by steering end-to-end architecture, fostering cross-functional collaboration, and integrating best practices to optimize performance and user experience.

Project 1:	Khulke
Duration:	13 Months
Link:	https://apps.apple.com/in/app/khul-ke-social-networking-app/id1590836834

- Modularized Meeting and Live Streaming functionalities into independent frameworks, enhancing code reusability, maintainability, and accelerating release cycles.
- Elevated user experience and delivered $500,000 value by migrating from UIKit to SwiftUI and implementing async/await for modern concurrency management.
- Designed and developed a SwiftUI-based Home Screen with reactive data pipelines, driving improved UI responsiveness, seamless interactions, and higher user engagement.
- Integrated RESTful APIs to enable robust, scalable, and efficient communication between modules, ensuring reliable data exchange and system interoperability.

Mobile Programming LLC, Remote | October 2021 to May 2023 | **Senior Software Developer**

- Enhanced project efficiency by 20% through strategic mentoring of five junior engineers and leading architecture discussions, driving robust, scalable, and high-performing banking solutions.

Project 1:	SC - Next Gen Banking
Duration:	18 Months
Link:	https://apps.apple.com/sg/app/sc-mobile-singapore/id367337298

- Contributed to the end-to-end development of a next-generation banking application for Singapore, optimizing profile, daily banking, and wealth modules, driving a 35% increase in usability and task completion rates.

HCL Technologies, Gurugram | May 2019 to October 2021 | **Lead Engineer**

- Spearheaded technical development programs, ensuring on-time delivery of $2M projects while architecting and maintaining 10+ reusable components and templates to drive scalable, modular design.

Project 1:	Airtel Payment Bank
Duration:	28 Months
Link:	https://apps.apple.com/in/app/airtel-thanks-recharge-bank/id543184334

- Delivered $500,000 in performance gains by enhancing user experience through migration from UIKit to SwiftUI and implementing async/await for advanced concurrency optimization.
- Architected and deployed critical application modules—Onboarding, IRCTC, Home Page, and Insurance—ensuring seamless integration, superior functionality, and enhanced user engagement.
- Revitalized the onboarding experience by redesigning workflows and aligning with modern design language, resulting in improved usability and customer retention.

Konnecs Infotech, Panipat | January 2016 to April 2019 | **iOS Developer**

- Spearheaded deep technical optimization of memory management, UI/UX rendering, and network performance, collaborating cross-functionally with product, QA, and development teams to elevate application quality and efficiency.

PERSONAL DETAILS

- **Date of Birth:** 21st June 1994
- **Languages:** English, Hindi & Punjabi
- **Address:** Gurugram
